EXPERIENCE

Systems & Automation Consultant

QuikCue Jul 2025 – Present

- Architected **PledgeNow**, a SaaS pledge-to-payment platform — Stripe Connect, GoCardless Direct Debit, WhatsApp automation, conditional funding, and installment plans for UK charities
- Built a **37-tool AI assistant** with generative UI — adaptive 12-column canvas, GPT-5 model routing, per-org budgets, and self-improving feedback loop persisted to DB
- Shipped **20+ security fixes** in one audit — auth guards on all API routes, cross-org data leak patches, GDPR Article 17 logging, webhook signature verification
- Delivered **8 production applications in 7 weeks** including a clinic platform, analytics dashboards, and marketing sites — each from architecture to deploy

Lead Full-Stack Developer

Charity Right Oct 2024 – Present

Sole technology hire for a UK charity processing ~\$4M/year in donations.

- Built a **unified donation data warehouse** — 4 sync pipelines into one PostgreSQL store with canonical transforms, CDC-ready architecture, and webhook-triggered deploy
- Designed a **Next.js donation checkout** with scheduled giving, Gift Aid, Apple Pay, Google Pay — replaced a legacy agency system end-to-end
- Created **25+ analytics reports** across 2 dashboards integrating 5 live data sources for executive and departmental decision-making
- Implemented **fraud prevention layer** — rate limiting, Cloudflare Turnstile, Stripe Radar enrichment, 3D Secure on all payment intents
- Cut **\$1,500/month** by terminating external agency; insourced maintenance, migrated hosting, managed a 4-person offshore team

Technical Operations Lead

C.I.E.F Worldwide Sdn Bhd Sep 2018 – Sep 2024

Lead developer for 3 production logistics platforms. 4,300+ commits (57% of all code) over 6 years.

- Architected **Exchange 2.0** — cross-border currency exchange (MYR/RMB/USD) with full booking-to-payment lifecycle, wallet system, bank reconciliation, and Billplz gateway
- Built the **Shipping Portal** — end-to-end logistics from China warehouse through customs, container shipping, and last-mile delivery with 3 external API integrations
- Integrated **1688 (Alibaba) supplier ordering** — purchase orders, currency conversion, and supplier bill grouping for Malaysia-China B2B trade
- Developed **billing and financial reporting** — automated invoicing, SST tax compliance, AutoCount exports, refund processing, and aging reports

Full-Stack Developer IP ServerOne Sep 2017 – Sep 2018
Independent Web Developer MediaSkip Enterprise Sep 2016 – Sep 2017
Web Developer Monkey Media Web Agency Dec 2014 – Dec 2016
